

# INVENTORY MANAGEMENT WORKSHOP

Reach new heights with supply chain management training

## Supply Chain Fundamentals

RockySoft and Lean Learning Associates have teamed up to deliver a hands-on inventory management workshop designed specifically for distributors and manufacturers. This 15-hour workshop delivers both education and training in the concepts and application of science-based inventory management methodologies for supply chains. Workshop participants will gain an understanding of what the various methodologies are, why they are effective, and how to apply them on the job. We will cover many topics in both lecture and hands-on interactive simulation formats.

## Improve customer service and reduce inventory.

You will learn successful supply chain management techniques that increase customer service levels while reducing costly inventory. Learn how to forecast and determine the correct amount of safety stock for every product. You will also discover how to analyze data and understand critical events that can affect your inventory levels. By using this knowledge in your day-to-day business, you will maintain the right amount of inventory to fill customer orders, reduce inventory and save money.

## A firm foundation for Inventory Management

This training is geared for supply chain professionals at all skill levels. Whether participants have years of experience or little to no training, this workshop teaches the techniques needed to maintain inventory and keep the supply chain moving.

## Chart a successful course

You understand that a successful company is one that creates goals and objectives and successfully implements them within a specific time frame. By providing this training to members of your company, you will have an organized methodology that helps the team meet the company's goals.

## Imagine the Piece of mind knowing with confidence:

- How much inventory you should have and why
- Where in the supply chain your inventory should be carried
- That your employees have the knowledge, tools and know how to manage your companies' single largest asset

## Inventory Management Workshop sessions:

Attendees will have the opportunity to work in teams as well as one-on-one with the instructors. Topics include:

1. The basis of supply chain
2. Customer service and inventory optimization
3. Hands-on training with our "Best in Class" inventory management

Your journey to greater understanding starts here

*"I enjoyed the training and learned a lot. The exercises enhanced the learning experience and also provided an opportunity for team building and collaboration. Overall, the training was interesting, informative and fun. I would recommend this to any company trying to improve inventory practices."*

**MARY FINLEY**  
Training Specialist  
Road Town Wholesale

*"The Inventory Management Workshop was very enlightening. I acquired a greater understanding of modeling and a tool for further refinement of TEC's supply chain. The instructors were enthusiastic and knowledgeable. I would recommend this workshop to any supply chain professional regardless of experience level."*

**THOMAS MCFARLING**  
Supply Chain Manager  
Texas Electric Cooperatives  
(Utility Supply & Service Division)

### About the Teachers

#### Jeffrey Porter, RockySoft

Jeffrey Porter heads up business development for RockySoft and has been with the company since its inception in 1999. He has a B.S. in Engineering and MBA from Colorado State University. Jeffrey joined Andersen Consulting in 1987 as a manufacturing systems consultant until the early '90s. Jeffrey has nine years of experience as a manufacturing development Engineer at Hewlett-Packard (HP).

During his tenure at HP he served as a project leader of numerous supply chain enhancements for material distribution and manufacturing entities within the Test and Measurement division. Among his major accomplishments was his leadership of the development and implementation of a Strategic Inventory Placement Application for HP. The application was based on scientific methods for establishing stocking levels in the supply chain to buffer against demand and supply variability.

Jeffrey Porter and Gregg Boxleitner

#### Gregg Boxleitner, Lean Learning Associates

Gregg Boxleitner has a rich mix of knowledge and hands-on experience in manufacturing, order fulfillment and supply chain management. He comes to us from Hewlett-Packard/Agilent Technologies after a career of almost 38 years. Gregg is an expert in his field and now lends his knowledge to educational seminars. Gregg earned a B.S. in Electrical Engineering from the University of Illinois in 1967, then joined HP working as a R&D engineer. During his tenure at HP Gregg held positions in marketing, production engineering, production management, information systems, manufacturing business planning, and supply chain management. Among his major accomplishments was his leadership of the development and implementation of a complete suite of manufacturing information systems at the Loveland (CO) Instrument Division of Hewlett-Packard.
